Course Level: All

Instructor: Ahmed El Fatmaoui

Section Size: All

## Question

1. Point out what you feel to be the strong points of the course.
2. Suggest any improvements you would like to see made in the course.

## Comment

1. Very organized and the professor communicated well.

2. N/A

1. He graded assignments and responded to emails very quickly. The assignments were not too difficult to understand and covered a good amount of material for how short the class was.

2. Grading on Excel was really my only issue. It seem me like I couldn't get any answers correct.

1. I really liked the case studies we did. It really helped me understand and comprehend the concepts we learned in class.

2. Being that this class was self-guided, it was hard to really focus to complete all of my work. It took a lot of time and effort to make sure that I understood everything that was taught.

1. I loved that while it was self-paced, there were still due dates to keep me on track for the exams. El Fatmaoui was well prepared and open for questions. The instructions, assignments, and exam were clear to understand easily.

2. Maybe some feedback about where we struggled for the next exams.

1. Very structured and well organized with immediate response if help was needed.

2. This course is not easy so clarification on expectations would be beneficial.

1. Easily accessible assignments

2. More instruction

1. I appreciated how fast my questions were answered when I was struggling with a concept. I also appreciated the video tutorials that were provided as help with the excel homeworks.

2. Extra practice problems would be helpful when studying for the tests.

1. There were a lot of good resources available via canvas to get information to complete the homework assignments.

2. Maybe an improved version of excel, the excel on safari would mess up sometimes and would count correct answers as incorrect. Other than that, I thought this was a pretty good class.

1. The assignments are well organized and the class is set up to be fair.

2. Have more of a lecture on how to use excel

1. I believe that the lecture notes were very informative and the homework helped me prepare for the exams. Learned a lot about excel.

2. I would give more examples on the homework like maybe give a lecture on how to work out each problem. I felt like I sometimes had no idea what I was doing and a review of the material would have helped.

1. Any time I had questions, he was always quick to respond to my questions and emails. This really helped and I never felt lost in the course.

2. No suggestions.

1. I felt that this course was the right amount of learning and workload for a winter session. I never felt overwhelmed or like the class was going much too fast, yet I was still kept busy and had to allocate much time to my learning. Also, Professor Fatmaoui was quick to respond to any questions I had.

2. I think the course could use more sources for additional explanation of the concepts. The textbook was somewhat helpful but could be confusing at times. I also found the lectures to be confusing and found myself wanting more explanation most of the time. With concepts as dense as those in statistics, it's very important to have a solid understanding of them, and I felt like I did not at times.

1. Professor El Fatmaoui was very helpful and responded very promptly and with very detailed feedback. I would definitely take another course with him, especially in an asynchronous setting like this because he still made me feel supported despite no face-to-face contact.

2.

1. It was really well prepared for a winter session course. There were tons and tons of resources readily available for use.

2. None really!

1. provided lots of resources for notes besides just the learn smart assignments and text book, offered lots of opportunities for extra credit

2. maybe advertise the resources available beside the text book at the beginning of the course instead of half way through?

1. I feel like the strong points of this course were definity the case studies. I felt like I learned a great deal of information from them.

2. More smart books but make them less time.

## eValuate Report - Fall 2021

1.

2. More tips and tricks with excel.

1. He was prompt on grading and if the class struggled he would explain in great detail.

2. Not much

1. Good lectures and I always knew what was going on easily.

2. Expand upon lectures and explain the math more.

1. Homework

2. Exam questions can be worded weirdly.

1. Very good lectures and reply times

2.

1. The videos that the professor created for the case studies helped immensely. His lectures were also very beneficial. The professor has everything posted that you need to succeed, and the course is largely self paced other than the exams, which is really nice off students who work over the break or have other commitments.

2. N/a

1. The course was well organized and everything was graded quickly. The professor was able to answer questions quickly.

2. I think that everything provided was more than sufficient, I do not have any improvement suggestions.

## eValuate Report - Fall 2021

### Response Key

1. Overall, I would rate my experience in this course as positive.
2. The instructor is well prepared.
3. The instructor provided useful and timely feedback on assignments and exams.
4. Overall, the instructor's teaching effectiveness was...
5. The grading was fair.
6. I would recommend this class to other students.

1 = Strongly Disagree, 2 = Disagree, 3 = Neutral, 4 = Agree, 5 = Strongly Agree

1 = Strongly Disagree, 2 = Disagree, 3 = Neutral, 4 = Agree, 5 = Strongly Agree

1 = Strongly Disagree, 2 = Disagree, 3 = Neutral, 4 = Agree, 5 = Strongly Agree

1 = Poor, 2 = Fair, 3 = Satisfactory, 4 = Good, 5 = Excellent

1 = Strongly Disagree, 2 = Disagree, 3 = Neutral, 4 = Agree, 5 = Strongly Agree

1 = Strongly Disagree, 2 = Disagree, 3 = Neutral, 4 = Agree, 5 = Strongly Agree
